

# Airwash Whisper Air Filtration Systems

## Three-Stage Filtration

**Stage 1:** Washable Foam pre-filter  
Removes large particulates.

**Stage 2:** HEPA filter  
99.97% efficient @ 0.3 microns. Removes dust, pollen, bacteria, animal dander, attached viruses, cigarette smoke, radon daughters and more.

**Stage 3:** V.O.C. filter  
Removes hazardous chemicals that may off-gas from cleaners, paints, solvents, carpets, furniture and other items containing synthetic materials.

## Easy-to-Change Filters

Easily removable for quick filter changes. Ask about filter options.

## Metal Cabinets

Provide greater protection of filters and internal components and do not emit toxins.

## Highly-Efficient Motor/Fan

Low electrical consumption when continuously run over a long period of time.

### How the Airwash™ works

Amaircare central systems operate on a by-pass system. A portion of the home's return air is routed through the air filtration system before it reaches the furnace or air handling system. This rerouted air is cleaned and fed back into the home's air supply via the furnace. By continuously cleaning the air significant reduction in pollution results.
